

e-Learning Solutions for Healthcare

Product	<h1 style="margin: 0;">K-Book™</h1>	 <p style="color: red; font-weight: bold; margin: 0;">K-BOOK INTERFACE</p>
Description	<p>e-Learning delivery platform and courseware interface</p> <p style="color: red; font-weight: bold; margin-top: 10px;">Version 3.0</p>	
Overview	<p>The K-Book is a highly intuitive, easy-to-use e-Learning user interface that is designed to work with Microsoft® Internet Explorer®. The stylized design eliminates the complexity and clutter of unnecessary menus, icons and toolbars letting even first-time computer users take advantage of e-Learning. The book style interface makes operation as easy as flipping pages in a book. Yet the K-Book is powerful enough to deliver graphics, instructional animations, video, interactive exercises and a voice-over audio track to keep even power-users fully engaged. A table of contents displays the available chapters and graphic icons indicate user progress. (not-started, partially complete, or finished). Chapter study icons indicate which chapters need further study, based upon prior test results. In addition to forward, backward and exit navigation buttons, users can access help, glossary, audio (on/off) or activate an “ask a question” feature that sends a pre-addressed email to the K-Book “owner/author” for requesting a point of clarification regarding content. The built-in testing capability assesses learner understanding, passes score information automatically to the Knowledge Tracking System and prints a certificate upon completion.</p> <p><i>Notable Features:</i></p> <ul style="list-style-type: none"> • Intuitive, easy-to-use interface with a variety of selectable “skins” • Designed to facilitate tailoring of content, images and attachments to customer needs • Audio voice-over, regular use of Interactives and a wide variety of multi-media formats maintain a high level of user interest and content retention. • Branded with customer logos; custom designed “skins” are optionally available • Integrated online testing with course certificate available for printing upon completion • Progress and chapter study icons track user progress and suggest areas of further study for test completion. • Seamless integration with the Knowledge Tracking System provides real-time information to managers and simplifies course management for the entire organization • Database driven design allows the fastest possible content development without the time and expense of customized FLASH or other graphic based tools • Content updates are instantly “rolled-out” to the entire readership 	
System Requirements	<p>Windows based systems with Internet Explorer that meet or exceed minimum system requirements. For more information visit www.k-book.com.</p>	
Deployment	<p>Provided as an annual service hosted and maintained by Knowledge-Forge on secure Internet servers or available for purchase and installation on customer’s servers.</p>	

FEATURES: K-Book e-Learning Platform
