

Learning Management System

Complete relief of your training compliance headaches

Assign,

Notify,

Deliver & Track

Any Learning Event

for 10 or 10,000 employees

from your desktop for pennies per person

Knowledge Tracking System - Professional™

Integrate all of your training and compliance testing into a single, easy-to-use, automated management system for organizations of any size.

Manage your own training in any format you create:

e-Learning

Classroom Training

PDF & WORD documents

PowerPoint® Presentations

Web Broadcast

Teleconferences

In-Service

Change of Procedure

Video, DVD or CD

Bulletins

Track any training—as easy as...

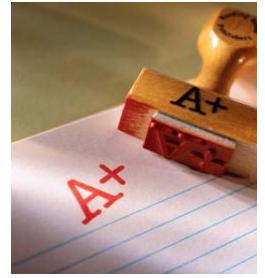

Enter instructions into a brief online form:

Provide some basic information describing the nature of your *Learning Event* as well as where and when it will be made available.

Setup a multiple choice test...

To assess understanding and track compliance you can easily add a test using the online Test Builder. Then, upon successful completion, the learner prints your customized certificate on the spot.

...Assign the Learning Event to a curriculum

The Curriculum Management function allows you to quickly assign and deploy any learning event to select employees individually, or by pre-defined groups or departments.

Automatic notification means... no one ever falls through the cracks

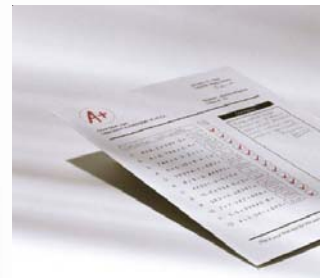

Once defined, each designated learner is automatically notified of every new learning event along with instructions regarding where and when the learning event will occur. If it is an online event, the email notification will include a link for instant access. The system automatically reminds employees in advance of annual or other recurring training obligations.

Upon completion, the learner is instructed to take a test, if required. Progress is automatically tracked and the framable certificate provides a paper backup

with a signature validating compliance.

Complete relief... of your training compliance headaches

Progress and test scores are automatically recorded in the system's database; completely eliminating the errors and effort of manual record keeping. Never wonder if an employee's training records are current and up-to-date. Built-in exception reports make it easy for managers to identify issues before they are problems as well as providing a complete history of training. All records are available 24/7 via the Internet or company intranet. You may choose to have Knowledge-Forge host and service the **Knowledge Tracking System –Professional™** or install it on your own servers.
